

## 1. Affordances

The door handle on the door. Users could push the handle to open the door.

## 2. Signifiers

The exit sign at the Fleming building. This tells the instruction how to exit the building.

## 3. system status/feedback

The fire alarm handle. By pushing down the handle, it will give feedback that the fire alarm starts to ring.

#### 4. Constraints

The password board contains unauthorized people from entering the building. People must enter the password or swipe the ID card to enter the room.

#### 5. Mapping

The air conditioner control panel controls the temperature of the room. Users can adjust the temperature rise or fall of the room through the control panel.
